**When compilation is IMPORT(ed) into LIBRARY,
<Fever [Maria Muldaur]> DOES NOT appear in compilation
track listing as desired!?**

**However, <Fever [Maria Muldaur]> DOES appear as
another/new track in the opened folder (copy) of the
“Remembering...” album along with the original track, i.e.,
each of the albums shown in the first pic is reopened with a 2nd
FEVER track along with the desired compilation import.**

**Net result is that my LIBRARY shows 31 albums (1 comp + 30
source) NOT the single (1) compilation.**
