

### Problem Running Media Center 31

Media Center 31 is running, but there may be a problem. Possible causes:

1. The program is also running under a different user account.
2. Media Center 31 and Media Server are both in Windows Startup. You must remove one.
3. The program is not responding for an unknown reason.

Please try rebooting the computer. Verify that no other user accounts are running the program.
